

Pre-owned machine. Guaranteed as new. Configured for your application.

Hartness 835 Case Packer

The **Hartness 835 Case Packer** is a top-loading, intermittent-motion case packer designed to provide flexibility and reliability in medium-speed production lines. It handles glass and plastic containers, cans and cartons, both round and specially shaped, and accommodates different case and tray formats. Its servo-controlled case transport and lift system provides precise handling, while quick, tool-free format changes simplify operation. An optional air-transfer system provides low-pressure handling of lightweight or difficult-to-handle containers, helping protect them during the packing process.
